

Scandinavian Coatings Center

– A coatings technology center with a multi-disciplinary approach

SP Technical Research institute of Sweden

We offer contract research, technical evaluation, testing, investigations and product development within coatings, paint and other surface treatment.

Scandinavian Coatings Center has unique competences and top-of-the-line equipment and is a collaboration form between SP Technical Research Institute of Sweden, YKI, Institute for Surface Chemistry and CBI Swedish Cement and Concrete Research Institute.

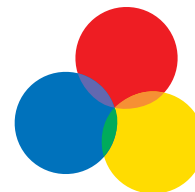

SP includes SP Träteck, former Träteck Swedish Institute for Wood Technology Research. Together we offer solutions and ideas within coatings technology for both domestic and international industry.

A multiplicity of applications

We can help and assist you within areas such as off-shore, protective/anti-corrosive, wood coatings and paints for concrete. We are strong and in many cases in a leading position within:

- Surface analysis
- Formulation
- Film formulation
- Ageing and durability
- Surface modification
- Water migration in wood
- Service life prediction
- Depth profile analysis

We have the largest and most diverse resources in Scandinavia for accelerated and natural ageing. SCC offers unique resources regarding equipment as well as competence!
