

An excerpt of the Swedish standards for emergency equipment

We offer testing and certification for the European market of intruder and fire alarm systems.

The following Swedish and European standards for alarm equipment, alarm systems and burglar alarm systems are published in Swedish.

Swedish standards for emergency equipment

SSF 1014 - System Components - Intruder Alarm Systems
SS 3654 - Fire detection and fire alarm systems - Fire brigade panel and fire brigade key

European standards for alarm system

EN 50130-4 - Electromagnetic compatibility
EN 50130-5 - Environmental test methods

European standards for intruder detection systems

EN 50131-1 - System requirements

EN 50131-2-2 - Passive infrared detectors
EN 50131-2-3 - Microwave detectors
EN 50131-2-4 - Combined passive infrared and microwave detectors
EN 50131-2-5 - Combined passive infrared and ultrasonic detectors
EN 50131-2-6 - Opening contacts (magnetic)
EN 50131-2-7-X Glass break detectors
EN 50131-3 - Control and indicating equipment
EN 50131-4 - Warning devices
EN 50131-5-3 - Interconnections equipment using radio frequency techniques
EN 50131-5-3/A1 - Interconnections equipment using radio frequency techniques - Appendix 1
EN 50131-6 - Power supplies
EN 50131-6 A1 - Power supplies - Appendix
EN 50132-X-X - CCTV surveillance systems
EN 50133-X-X - Access control systems
EN 50134-X-X - Social alarm systems
EN 50136-X - Alarm transmission systems and equipment
