Note: Certificates are issued in English.

The applicant hereby confirms

For ATEX in particular:

- that an application is not made to another Notified Body for products covered by this application.
- that the essential health and safety requirement in directive 2014/34/EU Annex II and the requirements in the applied standards, have been considered for the design, construction, marking and instructions .
- that the company is responsible for monitoring changes in "state of art" – which are evident from revisions of harmonized standards (ses <http://ec.europa.eu/growth/single-market/european-standards/harmonised-standards/equipment-explosive-atmosphere/>) - related to the certified products. If applicable standards are changed in a way that the protection is no longer equivalent to the technological knowledge according to 2014/34/EU, the company will send a new application. Further information about this responsibility is given in ExNB Decision Sheet ExNB/09/347/CS (which can be found on: https://www.vdtuev.de/themen/industrie_und_anlagensicherheit/brand_und_exschutz/clarification-sheets-of-exnb/pdokliste?oid=510535)
- that for each market where the company makes the product available, the accompanying instructions and the marking of the product are in a language which complies with the provisions of the country in question.
- that the company will follow the rules of SPCR 379.
- that an EU declaration of conformity or written attestation of conformity will accompany the product when this is required by the directive 2014/34/EU (see e.g. Annex IV)

For IECEx in particular:

- for IECEx ExTR and CoC; that the company will follow the rules of IECEx 02 and other applicable requirements of the IECEx system, and follow RISE Certification Rules SPCR 154.

For both ATEX and IECEx:

- for examination of electrical products according to EN/IEC 60079-0; that the company is responsible for the fulfilment of the requirements according to clause 6.1 b) and 28 in the standard (examination and verification by RISE of these requirements, are not included).
- that RISE will, during the validity period of the certificate, be informed about changes of products before carried out (may require examination, verification and revision of certificate by RISE), including changes of any precertified products included in the company's product (e.g. change of design, marking, instructions, standards or certificates for such precertified products, and if the supplier cease supplying such precertified products on the market).

The applicant also confirms

- that RISE is allowed to publish officially information contained in the certificate, except information in ExTR where RISE is allowed to publish officially information contained in the cover sheet of the ExTR and information published on the IECEx homepage (www.iecex.com).

Place, date
